This alphabetical index to articles includes listings by author and title.

Author Index

Akridge, Michelle, Barbara Lary, and Gerald H. Krockover. *Introducing Isolines.* February:31.

Altshuler, Kenneth. *Nuclear Technology: Making Informed Decisions.* January:34.

Antony, Erling, and Lee Buescher. *O Come, All Ye Alumni.* December:28.

Bartlett, Brewster, and Christopher Harper. *Putting in a Plug for Classroom Safety.* December:38.

Bickel, Ted, Jr. *Are Your Students Fluent in Chemistry?* October:41.

Birmele, Richard. *A Class Balancing Act.* September:46.

Borgford, Christie, and Lee Summerlin. *A Model Chemistry Class.* December:35.

Borst, Richard. *Kangaroos in the Classroom.* February:40.

Bowen, Daniel E. *Gardens of Knowledge.* May:53.

Buescher, Lee, and Erling Antony. *O Come, All Ye Alumni.* December:28.

Calkins, Jay R. *Modeling the Ocean in Motion.* January:28.

Carlone, Edward J. *A Sweet Springtime Adventure.* February:28.

Conway, Gregory J. *The Significance of Rising Sea Levels.* January:63.

Cothron, Julia H., Richard J. Rezba, and Ronald N. Giese. *What to Keep in Mind During Experimental Design.* November:32.

Cronin, Linda L. *Creativity in the Science Classroom.* February:34.

Czerwinski, W. Peter. *A New Lesson on the Horizon.* December:24.

DeLago, Louise Furia. *Why Did the Deer Cross the Road?* November:47.

DeWall, Marily. *The JASON Project.* March:48.

Dolph, Gary E. *Adventures in Ethnobiology.* January:57.

Dowden, Edward, and Joseph J. Semeister, Jr. *Computer-assisted Crystallization.* October:44.

Ehrman, Patrick, and Lucie Fritz. *On the Cutting Edge With Gene Splicing.* January:57.

Esler, William K., and Daniel Sanford. *Water Rocket Workout.* May:20.

Franklin, Carl E., and Sandra J. Rhoades. *The Art of Physics.* March:64.

Fritz, Lucie, and Patrick Ehrman. *On the Cutting Edge With Gene Splicing.* January:57.

Gessler, Johannes, and Owen C. Smith. *Advising and Educating the Engineers of Tomorrow.* May:33.

Giese, Ronald N., Julia H. Cothron, and Richard J. Rezba. *What to Keep in Mind During Experimental Design.* November:32.

Golden, Richard, and Cary Sneider. *The Greenhouse Effect in a Vial.* May:57.

Hague, George R., Jr. *It's All in the Presentation.* September:46.

Hall, Dorothy K. *Global Climate Change.* September:66.

Harper, Christopher, and Brewster Bartlett. *Putting in a Plug for Classroom Safety.* December:38.

Harte, David Victor. *Interactive Experiences Lead to Optimal Learning.* November:44.

Hesse, Joseph. *From Naive to Knowledgeable.* September:55.

Hounshell, Paul B. *Labs Off Limits.* April:30.

Hutchison, Betsy Atkins, and James C. Shuman. *Summer, Science, and Seniors.* March:67.

Isom, Steve, and Charles Lail. *A Gas of a Class.* March:45.

Johnson, Janice K. . . . *Or None of the Above.* April:56.

Jordan, Thomas M. *Spectacular Spectroscopy.* April:38.

Koenig, Robert, and Sharon Koenig. *Hometown Ecology.* November:53.

Koenig, Sharon, and Robert Koenig. *Hometown Ecology.* November:53.

Krockover, Gerald H., Michelle Akridge, and Barbara Lary. *Introducing Isolines.* February:31.

Lail, Charles, and Steve Isom. *A Gas of Class.* March:45.

Lamark, Dorothy Lane. *Set Your Class in Celestial Motion.* September:59.

Lary, Barbara, Michelle Akridge, and Gerald H. Krockover. *Introducing Isolines.* February:31.

Lilly, Sherril L. *Science Sleuths.* January:31.

Livingston, James B. *Reading Into the Subject of Science.* February:49.

Lonsdale, Stephen M. *You Think* Your *Classroom's a Jungle?* December:44.

Mahadeva, Madhu N. *From Misinterpretations to Myths.* April:33.

Mayer, Victor J. *Earth Appreciation.* March:60.

McCormack, Alan J., and Robert E. Yager. *A New Taxonomy of Science Education.* February:47.

Mentzer, Robert G. *Have Yourself a Pulley Demonstration.* December:28.

Michael, Valerie. *Graphical Analysis.* October:37.

Miller, John A., and Irwin L. Slesnick. *Difficult Decisions: Acid Rain.* March:33.

Miller, John A., and Irwin L. Slesnick. *Difficult Decisions: Should Modern Man Hunt?* November:50.

Mundy, Anne. *Marbles, Magnetism, and Matter.* May:25.

Nunnally, Marguerite. *Teacher Testing, Georgia Style* May:30.

Olmert, Patrick M. *Uncovering the Lives of Dinosaurs.* October:35.

Oppenheimer, Steven B. *Embryological Research.* November:40.

Orenstein, Lisa. *The Chemistry of Ceramics.* April:49.

Parakh, Jal S., and Irwin L. Slesnick. *Difficult Decisions: Animal Rights.* April:36.

Penick, John E., and Yager, Robert E. *An Exemplary Program Payoff.* January:54.

Phillips, Tom, and Yvette Van Hise. *Deck the Halls With Physics Projects.* December:28.

Posnick, Lauren. *Join the Earth Team.* March:36.

Rezba, Richard J., Julia H. Cothron, and Ronald N. Giese. *What to Keep in Mind During Experimental Design.* November:32.

Runyan, Charles V. *Does the Acid Rain Hypothesis Hold Water?* March:30.

Sanford, Daniel, and William K. Esler. *Water Rocket Workout.* May:20.

Schamp, Homer W., Jr. *Element-ary Development.* September:62.

Schwartz, Marjorie F. *Anxiety-free Urinalysis.* October:31.

Secosky, James J. *Did Water Leave Its Mark on Mars?* October:26.

Semeister, Joseph J., Jr., and Edward Dowden. *Computer-assisted Crystallization.* October:44.

Shuman, James C., and Betsy Atkins Hutchison. *Summer, Science, and Seniors.* March:67.

Sievers, Dennis. *A Robotics Round-up.* November:56.

Sievers, Dennis, and Alan Wilson. *Determining Planck's Constant Using a Light-emitting Diode.* February:44.

Slesnick, Irwin L., and John A. Miller. *Difficult Decisions: Acid Rain.* March:33.

Slesnick, Irwin L., and Jal S. Parakh. *Difficult Decisions: Animal Rights.* April:36.

Slesnick, Irwin L., and John A. Miller. *Difficult Decisions: Should Modern Man Hunt?* November:50.

Smith, Jack L. *Break-the-ice Demos.* September:46.

Smith, Owen C., and Johannes Gessler. *Advising and Educating the Engineers of Tomorrow.* May:33.

Sneider, Cary, and Richard Golden. *The Greenhouse Effect in a Vial.* May:57.

Soriano, Joseph R. *Thinking Through Writing.* March:70.

Sudaley, Rob. *Eskers, Moraines, and Erosion.* December:32.

Summerlin, Lee, and Christie Borgford. *A Model Chemistry Class.* December:35.

Taylor, Beverly. *Electrostatic Levitation.* November:37.

Texley, Juliana. *Radon: Reducible Risks, Rational Remedies.* January:42.

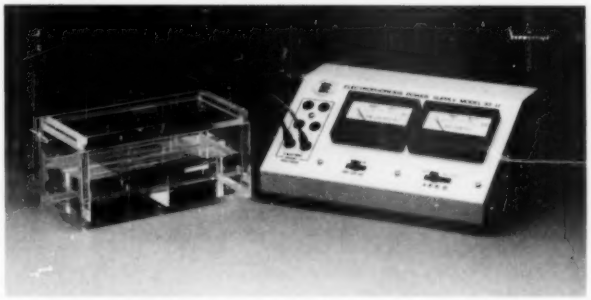
Attention: Biology Teachers

Introducing an affordable Electrophoresis Power Supply for classroom molecular biology. $150.



The ST-11 Electrophoresis Power Supply and Gel Box. The Power Supply carries 150 volts and sells for $150. The Gel Boxes sell for $90 each.

The ST-11 Electrophoresis Power Supply stretches your budget, accommodates 50% more students and lasts a lifetime.

- **Get more for your budget.** This 150 volt power supply is all you need for high school and college molecular biology. Why spend more for voltage you won't use?
- **Accommodates 50% more students for less money!** You get 3 gel box connections instead of 2 – that's 6 students to a power supply.
- **Guaranteed for life!** This Power Supply handles the tough conditions of high school and college molecular biology. If it ever breaks down during the normal course of use, we will fix it at no charge to you.

Gel Box $90. This Gel Box is specially constructed for maximum safety. The power is automatically disconnected every time you open the lid.

Grau-Hall Scientific designed the ST-11 Electrophoresis Power Supply and Gel Box especially for classroom molecular biology. Available exclusively through Grau-Hall.

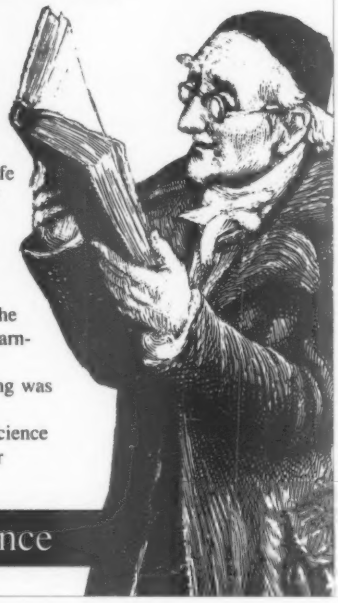
CIRCLE NO. 14 ON READERS SERVICE CARD

Not long ago, Physical Science class was something to be endured, not enjoyed.



Those days are gone, thanks to the Texas Learning Technology Group's Physical Science course. Through extensive research and the most advanced technology, TLTG brings the excitement of physical science to life by literally putting adventure at your students' fingertips.

TLTG Physical Science uses interactive videodisc technology to engage 9th and 10th grade students in active learning. Instead of being passive recipients of textbook lessons, the students are engaged in a highly interactive learning environment.

Teaching was never this exciting. Learning was never this much fun.

For information on the TLTG Physical Science Courseware, contact: **TLTG** 512•467•0222 or 800•252•8206 in Texas.

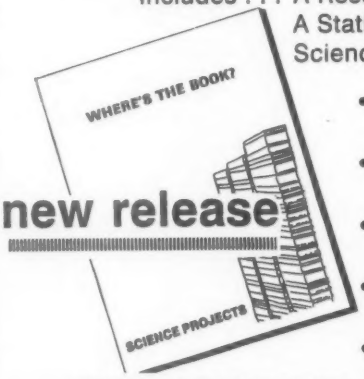
ATTENTION SCIENCE TEACHERS — GRADES 7 - 12

. . . A complete package designed to lead your students to successful science projects and fairs !

Includes . . . A Resource Booklet
A Statistics Program and
Science Fair Awards



- Teaches hypotheses, variables and controls.
- Practical, hands-on approach to science research skills.
- Written and field-tested by classroom teachers.
- Links the classroom with the resource center.
- Apple Software

COMPLETE PACKAGE $25.95 ORDER NOW

Attention: Biology Teachers

Would your students be more excited about biology if they could separate DNA?

This teacher and her students are separating DNA with the ST-11 Electrophoresis Power Supply and Gel Box. Available exclusively through Grau-Hall.

How you can teach the latest in molecular biology in as few as three class periods.

Rapid developments in biological technology make it possible for high school biology teachers to add hands-on molecular biology to the curriculum. Schools across the country are exposing this exciting field to their students with great success.

Now, your students can separate and recombine DNA with new, affordable equipment from Grau-Hall Scientific. Designed by Grau-Hall especially for classroom use, these products are the most affordable on the market. With a practical curriculum, your students can perform DNA separation experiments in only three class periods.

ST-11 Electrophoresis Power Supply

$150 each. Our Power Supply accommodates 50% more students than our competitors' models. The ST-11 has three Gel Box connections instead of two – that's six students to a Power Supply. Plus, it's guaranteed for life. If it ever breaks down during normal use, we will replace it or fix it free.

Gel Box

$90 each. Safe for classroom use. When opened, the safety lid automatically shuts off the power.

Free product and information package from Grau-Hall.

Grau-Hall Scientific carries hundreds of classroom biology supplies at prices you can afford. For more information about how to integrate molecular biology into your curriculum, call Grau-Hall at 1-800-331-4728.
